

Trimming a Moravian Lovefeast Candle

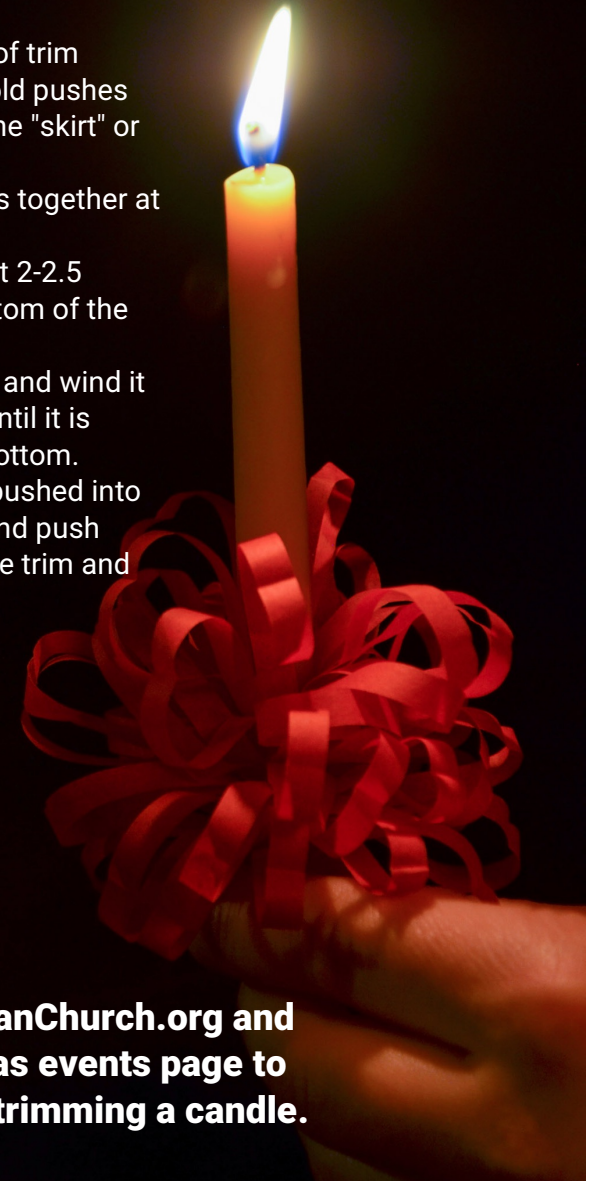

1. Fold over the piece of trim long-ways (so the fold pushes outwards) to form the "skirt" or "ruff."
2. Hold the two corners together at one end of the trim.
3. Start trimming about 2-2.5 inches from the bottom of the candle.
4. Hold the trim tightly and wind it around the candle until it is about 1 inch from bottom.
5. Remove tack (now pushed into bottom of candle) and push through corner of the trim and into the candle.
